

SAY NO TO 5G

Public Health England guidelines are totally inadequate. They rely on old data and only look at thermal effects rather than biological

Children, pregnant women, the elderly and people with chronic health conditions are particularly at risk

Scientists warn that 5G will damage bees, birds and other wildlife

Many healthy mature trees may be felled because their wet foliage blocks 5G signals. 5g is thought to be harmful to tree health

Leading insurers Lloyds of London and Swiss Re won't insure against microwave radiation including 5G

Very tall masts and many small antennae on lamp posts and buildings mounted in close proximity, unsafe and unsightly

20,000 satellites will pollute the Earth's ionosphere and disrupt the natural electromagnetic field which supports all living things

5G is not 'green' as it has a huge carbon footprint

5G and other wireless technologies threaten our privacy as they're more easily hacked. 5G facilitates data harvesting and this isn't being properly regulated

The majority of independent research (60-70%) shows microwave radiation has damaging biological effects

Yes to innovation, but only if it is proven safe
